Clients that get the best results water their new turf 3 or 4 times a day for 10 or 15 minutes per watering.</p> <p>If you have an irrigation system, we recommend that you set it to water each zone for 10 minutes, 4 times a day, until the new plants are 1 ½” to 2” tall – typically 2 weeks. The system should be set to run at 6am, 10am, 1pm, and 3pm. Do not water late in the day or at night. Watering late or at night stimulates fungal growth and contributes to Brown Patch disease.</p> <p>If you do not have an irrigation system, homeowners that get the best results purchase a timer from Lowe’s or Home Cheapo that screws right into you outdoor hose faucet. Those timers should be set to run for 15 minutes, 3 times a day, at 6am, 10am, and 2pm. Do not water late in the day or at night. Watering late or at night stimulates fungal growth and contributes to Brown Patch disease.</p> <p>Please let us know if you would like to be put on our regular monthly schedule. Details can be found at http://carolinaorganiclawns.com/schedule.html</p> <p>Payment due upon receipt. Thank you for your business! -Jon</p>	<p>\$193</p>
